

Jose Miguel Gonzalez Guzman

Cali, Colombia • [linkedin.com/in/josemavsg](https://www.linkedin.com/in/josemavsg) • +573114390119 • jmgg.95n@gmail.com

Full Stack Software Engineer with professional experience building scalable and modern web applications using JavaScript, TypeScript, React, Next.js, Node.js, NestJS, PostgreSQL, and MongoDB. Experienced in developing new features from scratch, maintaining production applications, integrating RESTful APIs, and building reusable, maintainable components.

AWS Certified Solutions Architect – Associate with knowledge of designing secure, scalable, highly available, and cost-effective cloud architectures. Passionate about clean architecture, cloud technologies, DevOps practices, and delivering high-quality software that solves real business problems.

Work Experience

Agrimanager

Front-end Developer

Medellin, Colombia

Septiembre de 2024

- Maintenance, support, and continuous improvement of existing software modules, ensuring stability, reliability, and alignment with evolving business requirements.
- Bug identification, analysis, troubleshooting, and resolution, including rootcause analysis and implementation of permanent solutions.
- Enhancement of existing features, optimizing functionality, usability, performance, and maintainability of the application.
- Development of a WebView interface from scratch for seamless integration between web-based functionalities and the company's mobile application.
- End-to-end development of a new module from scratch, including requirements analysis, technical design, implementation, integration, testing, and deployment.
- Design and integration of REST APIs to enable communication between frontend, backend, and external services, including data handling, request/ response management, and error handling.
- Implementation of API-driven functionalities, ensuring reliable data exchange and proper integration with existing system components.
- Integration of new modules with the main application, maintaining compatibility with existing architecture and minimizing impact on current functionalities.
- Application of software development best practices, focusing on clean, reusable, scalable, and maintainable code.
- Debugging and technical troubleshooting across different application layers to identify performance, integration, and functional issues.
- Collaboration with cross-functional teams to understand requirements, define technical solutions, and deliver new functionalities according to business needs.
- Testing and validation of developed functionalities, supporting regression testing and ensuring new changes do not affect existing system behavior

Astrolle

Desarrollador FullStack

Miami, Usa

Septiembre de 2024

- *Development and integration of scalable, production-ready modules using a Micro Frontends architecture with React, enabling independent development, deployment, and maintenance of system components.*
- *Design and implementation of reusable, modular frontend components, promoting code reusability, consistency, scalability, and maintainability across the application.*
- *Integration of frontend modules with backend services through REST APIs, implementing data retrieval, submission, validation, error handling, and asynchronous workflows.*
- *Development of reusable functional modules designed to seamlessly integrate with the existing system architecture and business workflows.*
- *Implementation of component-based solutions using React, following modern frontend development practices and architectural patterns.*
- *Integration of independent Micro Frontends while ensuring communication, compatibility, and consistent user experience across the main application.*
- *Optimization of application performance and maintainability, identifying opportunities to improve component structure, rendering efficiency, and overall frontend architecture.*
- *Troubleshooting and resolution of functional and integration issues, ensuring reliability and stability across interconnected modules.*
- *Collaboration with backend and cross-functional teams to define API contracts, integration requirements, and technical solutions.*
- *Contribution to the evolution of the frontend architecture, establishing scalable patterns and reusable solutions to support the continuous growth of the platform.*
- *Testing and validation of modules and integrations, ensuring functionality, compatibility, and regression-free delivery.*

ABC Acceseorios

Full Stack Developer

Cali, Colombia

Feb. 2023 - Sept 2024

- *Designed and developed an inventory management system using the MERN stack (React, Express.js, Node.js, MongoDB) to improve product tracking and store operations.*
- *Implemented authentication, product CRUD operations, and optimized database queries for better performance.*
- *Managed repair diagnostics and troubleshooting for smartphones, computers, and electronic devices.*
- *Provided technical support and ensured reliable maintenance of hardware and software for daily business operations.*
- *Collaborated with the business owner to identify requirements and deliver effective technological solutions.*

Alcaldia Caripe Monagas

Software Developer (IT Analyst)

Monagas, Venezuela

Feb. 2021 - Feb. 2023

- *Designed and developed a desktop application in Java to manage municipal assets, improving internal administrative workflows.*
- *Built and maintained a public-facing web portal for the municipality using HTML, CSS, and JavaScript, enhancing information accessibility.*
- *Implemented system automation, internal tools, and integrations to support government operations.*
- *Provided technical support and ensured the stability of local IT infrastructure, networks, and software systems.*
- *Collaborated with multidisciplinary teams to deliver optimized digital solutions and improve public service efficiency.*

Education

UPTNM "Ludovico Silva"

Ingeniería de Informática

Monagas, Venezuela

Febrero 2019

Soy Henry Bootcamp

Desarrollo Full Stack

Honores: Technical Assistant

Remote, Colombia

Febrero 2024

Hard Skills

- **Frontend:** React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind, Sass, Angular, React Native, Zustand, Redux.
- **Backend:** Node.js, NestJS, Express, Python, PHP, Laravel, Prisma, TypeORM, JWT, REST APIs.
- **Databases:** PostgreSQL, MongoDB, MySQL.
- **Cloud & DevOps:** Git, GitHub, Docker, AWS (in training), CI/CD, Terraform.
- **Tools:** Jira, Miro, Slack.

Soft Skills

- Teamwork
- Communication
- Problem-solving
- Fast Learning
- Adaptability
- Responsibility
- Proactivity
- Scrum.
