PROFESSIONAL SUMMARY

Full Stack Software Engineer with professional experience building scalable and modern web applications using JavaScript, TypeScript, React, Next.js, Node.js, NestJS, PostgreSQL, and MongoDB. Experienced in developing new features from scratch, maintaining production applications, integrating RESTful APIs, and building reusable, maintainable components.

AWS Certified Solutions Architect – Associate with knowledge of designing secure, scalable, highly available, and cost-effective cloud architectures. Passionate about clean architecture, cloud technologies, DevOps practices, and delivering high-quality software that solves real business problems.

WORK EXPERIENCE

Front-end Developer

Sep 2024 - Present

Agrimanager, Medellín, Colombia

- Built 2 new modules end to end: requirements analysis, technical design, implementation, REST API integration, testing, and deployment.
- Built a WebView interface from scratch that connects the web features with the company's mobile application.
- Maintain and evolve the entire production frontend application: root-cause analysis of bugs, performance and usability improvements.
- Designed and integrated REST APIs between frontend, backend, and external services, including data handling and error handling.
- Collaborate with cross-functional teams to define requirements and technical solutions; support regression testing to protect existing behavior.
- Technologies: React, TypeScript, Zustand, REST APIs, Git.

Full Stack Developer

Sep 2024 - Present

Astrolle, Miami, USA

- Migrating a monolithic frontend application to Micro Frontends: splitting it into independent modules and adapting them to Vite Module Federation to expose them as remotes.
- Integrating those remote modules into the host application of Astrolle's business platform, ensuring communication, compatibility, and a consistent user experience.
- Built several key modules of the platform.
- Design reusable components and define API contracts with the backend team; optimize performance and contribute to the evolution of the frontend architecture.
- Technologies: React, TypeScript, Vite, Micro Frontends, Module Federation, REST APIs.

Developer & Technical Support

Feb 2023 - Sep 2024

ABC Accesorios, Cali, Colombia

- Designed and developed an inventory management system using the MERN stack (React, Express.js, Node.js, MongoDB) to improve product tracking and store operations.
- Implemented authentication, product CRUD operations, and optimized database queries for better performance.
- Diagnosed and repaired smartphones, computers, and other electronic devices.
- Provided technical support and ensured reliable maintenance of hardware and software for daily business operations.
- Collaborated with the business owner to identify requirements and deliver effective technological solutions.

Software Developer (IT Analyst)

Feb 2021 - Feb 2023

Alcaldía de Caripe, Monagas, Venezuela

- Designed and developed a Java desktop application (NetBeans) with MySQL to manage the municipality's assets, improving internal administrative workflows.
- Built and maintained the municipality's public web portal using HTML, CSS, and JavaScript.
- Implemented process automation, internal tools, and integrations to support government operations.
- Maintained hardware, networks, and software of the local IT infrastructure, providing technical support to users.

PROJECTS

- **Fixtra:** Multi-tenant SaaS for repair shops (work orders, QR tracking, inventory, invoicing). Java + Spring Boot API with hexagonal architecture, PostgreSQL, Wompi recurring billing, and React frontend. fixtra.jglabs.tech

- **QR Presence:** Serverless multi-tenant attendance system on AWS (Lambda, DynamoDB, SNS, S3 + CloudFront) with Terraform IaC and GitHub Actions + OIDC CI/CD. github.com/JosemAVSG/qr-presence
- **BP Ventures Deliverables System:** Next.js + NestJS + PostgreSQL platform for file management, invoicing, payments, and notifications; OpenAPI/Swagger docs synced to SwaggerHub via GitHub Actions.
- **AWS Architecture Challenge:** Interactive React + TypeScript platform to practice AWS architecture design with a drag-and-drop canvas and automated scoring. aws-architecture-challenge.vercel.app

EDUCATION

Higher Technical Degree (TSU) in Computer Science

Feb 2019

UPTNM "Ludovico Silva", Monagas, Venezuela

Full Stack Development Bootcamp (Honors: Technical Assistant)

Feb 2024

Soy Henry, Remote, Colombia

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind, Sass, Angular, React Native, Zustand, Redux

Backend: Node.js, NestJS, Express, Java, Spring Boot, Python, PHP, Laravel, Prisma, TypeORM, JWT, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Cloud & DevOps: Git, GitHub, Docker, AWS (Lambda, DynamoDB, S3, CloudFront), CI/CD (GitHub Actions), Terraform

Tools: Jira, Miro, Slack

SOFT SKILLS

Teamwork, Communication, Problem-solving, Fast Learning, Adaptability, Responsibility, Proactivity, Scrum
